CORNELIUS VÖGE – ATELIER FOR ARKITEKTUR

NARRATIVE NORDIC ARCHITECTURE AND SOLUTIONS OF HIGH QUALITY

CORNELIUS VÖGE – Atelier for Architecture was established in 2006 by Danish architects Nanna Vöge and Dan Cornelius. The studio now has 15-20 employees and has won several international and national competitions.v

The studio is recognised for its narrative Nordic architecture and modern interpretations of the Danish-Nordic architectural tradition. It has built a number of award-winning buildings such as The North Atlantic House in Odense and received several awards for its practice. In 2018, the studio was the first to be honored with the Halldor Gunnløgssons Fonds Hæderslegat in architecture:

” Through their persistent development of a clear set of values and an undisputed decency in building designs they have accomplished to sharpen their artistic contribution so well that the studio today appears as one of our best interpreters of the Danish-Nordic architectural heritage.”

To us, architecture is a communicative form of art. Buildings have stories they want to tell and context is key to the narrative of all landscapes and buildings we develop, design, transform and build. From early ideation and sketching to finished buildings; the local, physical, historical, social-cultural and organisational contexts are thoroughly analysed and carefully considered in all parts of our process.

We consider architecture as the added value to all kinds of building, urban and landscape planning. Architecture increases the keeping quality and total value of all projects and with focus on quality and lasting solutions, sustainability is a natural and integrated part of the way we work.

The studio offers strategic client consultancy and high quality sustainable architectural solutions to public and private clients.

Within planning, preservation and development of cultural heritage, transformation of existing buildings, reconstruction and new building we advise and provide solutions for our clients from early-stage analyses, stakeholder and user involvement, ideation and sketching to completed project.

The studio has special expertise in planning and building for recreational, cultural and educational use, social and health care purpose and urban development including climate change adaptation projects such as coastal protection of towns and harbours with special preservation status.

One should understand that all places have layers of recollection – wherever you build has a story and traces of what was. It is those stories that we unfold as buildings

HISTORICAL LAYERS IN CITY AND BUILDING

H. C. ANDERSEN HOUSE

Invited intl. comp. 1st prize

Inaugurated 2021

Team: Kengo Kuma & Associates, Cornelius Vöge, Masu Planning

*Even the most iconic structure must
respect its surroundings, convey the
site's history and interpret what already
is and has been*

HERITAGE AND TRADITION IN COUNTRY AND CITY

THE NORTH ATLANTIC HOUSE

Odense, 2011-2013

Invited intl. comp., 1st prize

A building must speak to one's senses and memories while arousing both curiosity and unconscious recognition. Without words, it must be able to tell its story

IDENTITY AND COMMUNITY

CULTURE AND SPORTS FACILITY
Jyllinge, 2014-2018

The shared space is the physical manifestation of the community. The contribution of architecture is to convey who we are, what we can and to facilitate what we collectively want

ANCHORED AND PERPETUAL

VINDINGE PARISH HOUSE
Vindinge, 2015-2017

*If a building looks like
it has always been,
it will be forevermore*

GENTLE AND TRANSPARENT

COFFEE TOWER

Rødovre, 2019-2022

Transformation of a protected industrial building to a new communal centre.

*An empty building can be so
captivating that our only job
is to gently open it for the life
that awaits to fill it*

*One must be able to feel the space.
It is the task of the architect to
create an impression that is more
noticeable than the means in
which the impression was created*

TACTILITY AND PRESENCE

LIVSRUM
Herlev 2017-2020
Counselling centre for cancer patients

TRACKS AND TRACES

GUBSØE CLASSIC CAR GARAGE

Gubsøe, 2018-21

Workshop and visitors center

*One must understand that every place
always has layers of memories - that there
are stories and tracks everywhere you
build. These are the stories we unfold as
buildings*

*Socially sustainable urban development
requires attention to the importance of
informal and expectant spaces for popular
communities, human health
and well-being*

COMMUNITIES AND THIRD PLACES

BYENS HAVER
Roskilde, 2021-2025
Invited intl. comp., 1st prize
Urban development of Roskilde Sydvest
Team: Cornelius Vöge, Masu Planning, Gründl Haahr
